

How to choose an instrument the OMERACT way

understand what you are trying to measure
review domain definition and context of measurement

find the candidate instruments
then for each instrument...

domain match?
ask a lot of people; is this instrument capturing the chosen domain well?

narrow the field
set aside any red-flagged instruments. short list the instruments.

is it feasible to use?
is it practical to use this instrument? think about burden, time, cost, equipment.

gather the evidence
find, appraise and synthesize the measurement property evidence. look for consistent findings of good performance from good quality studies.

identify the winners:
those that have passed the Filter 2.1. discuss work with Technical Advisory Group

get the OMERACT OK

brought to you by: Technical Advisory Group of

INSTRUMENT OMERACT PROVISIONAL ENDORSEMENT

The Technical Advisory Group (TAG) of OMERACT agrees that the body of evidence gathered by the Psoriatic Arthritis working group supports that:

HAQ-DI

is provisionally endorsed as having passed the OMERACT Filter (2.1) as a measure of Physical Functioning in Psoriatic Arthritis
