

UNDERSTAND WHAT YOU ARE INTENDING TO MEASURE: THE TARGET DOMAIN

WORKING GROUP:

This form is designed for working groups to ensure a thorough review of the target domain definitions. It is essential to revisit the detailed definition report developed during the Core Domain Set (CDS) process, which serves as the foundation for instrument selection. By reviewing the qualitative and quantitative materials gathered in the CDS development phase, the group ensures that the instruments selected align accurately with the intended domain and its meaning.

Name of Target Domain:

Link to Domain Definition Report:

Have any new insights or clarifications risen from the review of the domain definition report?

Yes

No

If yes, describe any new insights or clarifications and how they impact the instrument selection process:

Date of Submission:
