

QUALITATIVE WORK TO IDENTIFY CANDIDATE DOMAINS - RESULTS

WORKING GROUP:

This report outlines the differences between the initial qualitative work plan and summarizes the findings from the qualitative research conducted as part of the Core Domain Set development process.

1. Alignment of Work Plan with Qualitative

Reflecting on the qualitative work, please address the following changes between the outline of your qualitative work plan and the completed qualitative work.

Item & Description	Completed Qualitative Work
Ethics Approval:	
Facilitator Qualifications and Role:	
Relationship Between Facilitator and Participants:	
Theoretical framework:	
Participant Selection Process:	
Setting:	
Data Collection:	
Domain Identification:	
Data Analysis Plan:	

2. Results of Qualitative Research

2.1 Focus groups/Interviews: provide an overview of the focus groups and interviews conducted, detailing the location, sample size, and the collaborator groups represented.

Location (Country/Continent)	Sample size	Collaborator groups represented

(Expand as needed)

2.2 Participant Demographics: summarize participants' demographics in focus groups and interviews below to provide context to the qualitative findings.

Age Range	Sex	Sample Size	Disease Types	Disease Duration

(Expand as needed)

2.3 Qualitative Findings: summarize the synthesis and interpretation of the data and provide links to your evidence. Describe the derivation of themes and any diverse cases found.

2.4 Moderated online discussion board results: if moderated online discussion boards were used as an additional qualitative tool, summarize details about the online platform.

Discussion Platform	Number of Participants	Geographical Representation	Demographics	Illustrative Quotes

(Expand as needed)

3. Link to Domain-Development-Tracker:

Using the results of your literature search and qualitative work, ensure the results are collated correctly into the Domain Development Tracker spreadsheet.
