BINNING & WINNOWING- RESULTS

WORKING GROUP:

This report confirms that the working groups have completed the binning and winnowing of domains, themes, items, and concepts generated from the scoping review and qualitative research. This step in the Core Domain Set development process helps to streamline and refine the list of candidate domains, ensuring that only relevant and distinct domains are included in the Delphi.

1. **Alignment of Work Plan with Binning & Winnowing**
   Reflecting on the binning & winnowing, please address the following changes between the outline of your work plan and the completed binning & winnowing process.

2. **Summary of Binning & Winnowing**

Meeting Dates	Key Decisions Made	Observations from Binning Process	Observations from Winnowing Process	Additional Notes

(expand as necessary)
