

PRIORITIZATION OF CANDIDATE DOMAINS THROUGH DELPHI SURVEY - RESULTS

WORKING GROUP:

This report outlines the differences between the initial Delphi work plan and summarizes the findings from the Delphi conducted as part of the Core Domain Set development process. This report should include detailed feedback on the consensus process, including a link to round-by-round results, participant demographics, response rates, and rating outcomes by collaborator group. Automated reports from Delphi software may be attached where indicated.

1. Alignment of Work Plan with Delphi

Reflecting on the Delphi process, please address changes between the outline of your work plan and the completed Delphi.

2. Delphi Consensus Results Overview

For each round of the Delphi process, provide a brief analysis of the results, including percentage agreement by collaborator group. Highlight any significant differences between groups and key decisions made by the working group in response to the findings.

2.1 Round 1:

2.2 Round 2:

2.3 Round 3:

2.4 Round 4:
