4. OVERALL ASSESSMENT: DOMAIN MATCH

Based on the assessment of items 1-3 above, the Working Group evaluates whether the instrument aligns with the target domain.

Working Group Assessment:

GREEN: The instrument is a strong match with the domain. It meets the necessary criteria, and the work can move forward without changes.

AMBER: The instrument is generally a good match but has some concerns or weaknesses. Revisions or clarifications may be needed before proceeding cautiously.

RED: The instrument does not sufficiently match the domain. Significant issues need to be addressed before progressing further.
