

METHODS PROTOCOL DECISION FORM FOR SYSTEMATIC REVIEW OF MEASUREMENT PROPERTIES

WORKING GROUP:

This form is intended to guide the working group in determining the methods protocol for a systematic review of measurement properties. The working group will adhere to the methods outlined in the OMERACT Handbook and the provided protocol template. Any deviations from the OMERACT approach must be documented and reviewed by the Technical Advisory Group (TAG).

Please mark one of the following options with an 'X':

1. Working group will follow methods outlined in the OMERACT Handbook and [Protocol template](#). TAG Check in needed. **Proceed to question 3.**

Working group will develop a protocol and outline the deviations from the OMERACT approach. Full TAG review needed. **Proceed to question 2.**

2. If deviating from the OMERACT approach, please outline the specific deviations and provide justification:

3. Link to protocol:
