

## IDENTIFY DOMAINS FOR COMPOSITE DEVELOPMENT

### WORKING GROUP:

*As part of the composite outcome measure development process, working groups must clearly define each domain proposed for inclusion. This ensures a shared understanding of what each domain represents and supports rigorous instrument selection, weighting, and alignment with the overall target concept. A Domain Definition Report must be completed for each proposed domain.*

### DOMAIN IDENTIFICATION

Domain Name	Domain Description	Explain how this domain contributes to the target concept	Source of Domain (e.g., core set, new domain)	Supporting Evidence (list supporting sources)

\* Complete another for if there are additional domains or components included in your composite.
