Through rigorous methodology and our global Working Groups, OMERACT supports the development of Core Outcome Sets (COS), identifying patient and disease-relevant areas to be measured (domains) and the corresponding measurement instruments for use in clinical trials, including those for regulatory approval of new treatments.

GOALS & OBJECTIVES

Industry sponsorship of OMERACT serves as a powerful catalyst for collaboration and mutual support between our independent international research organization and esteemed industry collaborators in the field of rheumatology. Through strategic partnerships with industry leaders, we unlock immense potential to advance our mission.

The pivotal role of industry sponsorship in OMERACT is threefold:

-  Industry sponsorship provides critical financial resources that enable OMERACT to conduct research, develop Core Outcome Sets, support our 35+ working groups and host conferences and meetings. This financial support enhances OMERACT's ability to make a meaningful impact on outcome measurement research in rheumatology.
-  Industry sponsors bring valuable expertise and insights to the table, which contributes to the development of Core Outcome Set and the validation of outcome measures. Collaborating with industry allows OMERACT to draw on the industry's knowledge and experience, fostering a synergistic relationship that benefits both parties.
-  The collaboration between OMERACT and industry sponsors ultimately aims to improve patient outcomes in rheumatology. By working together, both parties can contribute to the development of meaningful and patient-centered Core Outcome Sets that have real-world applications in clinical practice.

OMERACT stands as a trailblazing organization with a remarkable track record of over 30 years, leading the charge in advancing Core Outcome Sets. Its systematic and rigorous approach has yielded extraordinary achievements, developing and validating top-tier Core Outcome Sets that ensure the highest quality and reliability of data. Through international collaboration, OMERACT has harnessed the collective expertise of experts, researchers, clinicians, patients, and industry collaborators, sparking unprecedented innovation in rheumatology research. The impact of OMERACT's core outcome sets cannot be overstated; they have become the gold standard in clinical trials, enhancing comparability and consistency across studies, and yielding more reliable and meaningful results.

OMERACT's conferences and meetings serve as epicenters of knowledge exchange, fostering unprecedented collaboration that is driving advancements in outcome measurement in rheumatology. As an influential organization, OMERACT's guidance and recommendations wield immense power, shaping the future of outcome measurement research in rheumatology on a global scale. By supporting OMERACT, industry stakeholders proudly display their unwavering commitment to evidence-based practice, patient-centered outcomes, and the relentless pursuit of progress in the field of rheumatology.

MEET OUR BUSINESS ADVISORY COMMITTEE CO-CHAIRS

Meet our dynamic Business Advisory Committee Co-Chairs, the driving force behind OMERACT's financial sustainability and growth! With a shared passion for advancing patient outcomes in rheumatology, they lead our efforts to secure strategic sponsorship and partnerships. As passionate advocates, our BAC Co-Chairs represent OMERACT in external forums, promoting the importance of outcome measures in rheumatology research.

WORKING GROUPS

OMERACT categorizes working groups into six thematic areas, each addressing unique facets of Core Outcome Set Development:

1. **Disease Theme:** focuses on specific health conditions, often within the realm of rheumatology but potentially extending to related fields. These groups aim to establish and refine Core Outcome Sets specific to the disease.

Adult Still's Disease

Calcium Pyrophosphate Deposition (CPPD)

Chronic Nonbacterial Osteomyelitis (CNO)

CTD-ILD

Foot & Ankle Disorders

Gout

Hand OA

Hip & Knee Osteoarthritis

Juvenile Idiopathic Arthritis

Myositis

Patient Outcomes in Longitudinal Observational Studies (POLOS)

Polymyalgia Rheumatica (PMR)

Rheumatoid Arthritis

Scleroderma Vascular Disease

Shoulder Pain Outcome Measures

Sjögren's Disease

Systemic Lupus Erythematosus

WORKING GROUPS

2. Imaging & Biomarkers: concentrates on the evaluation and endorsement of imaging techniques and biomarkers as reliable outcome measures in rheumatological research and clinical trials. These specialized working groups aim to integrate modern imaging technologies like MRI, ultrasound, X-ray, or CT scans, as well as biochemical markers detectable in blood, urine, or tissue samples, into the Core Outcome Sets developed for specific diseases or conditions.

Juvenile Idiopathic Arthritis MRI (JAMRI)
MRI Taskforce
Synovial Tissues in RCT
Ultrasound

3. Bolt-On: a supplemental measure or set of measures (such as a questionnaire or a set of clinical indicators) that can be added to a Core Outcome Set to make it more comprehensive or applicable to a particular population or context.

Adherence
Shared Decision Making

WORKING GROUPS

4. Domain Specific: focuses on the in-depth exploration and understanding of specific domains, or areas of concern, that are critical for assessing patient outcomes in the field of rheumatology. These domains could include factors like pain, physical function, mental well-being, or other relevant domains that help to gauge the effectiveness of treatments and interventions.

Glucocorticoid-Related Adverse Events

Pain

Remission in RA-patient perspective

Safety

Worker Productivity

5. Composites: focuses on the development, validation, and refinement of composite. A composite measure is a single score or index that combines multiple individual instruments or domains, offering a more holistic view of patient status.

ANCA-Associated Vasculitis

Behçet's Syndrome

Flares in OA

Large Vessel Vasculitis

Late Stage Knee & Hip OA

Psoriatic Arthritis
